

CONTEST MOTIVE

English is the main subject in all over the world. To reinvent the education system and give students an opportunity to perform on national level and compete with students from all over the country, there is a dire need to resuscitate the Quiz values in our schools & colleges. This year a crew of subject experts have intended the quiz competition for our students with reference to their curriculum. The aim of this competition is to encourage and promote healthy competition among students.

Beyond the obvious academic advantages of exposing a child to new ideas and abilities at young age, quizzes fundamentally alter how education is provided.

Today's online quizzes are interactive avenues where students may learn, look for possibilities to succeed beyond the classroom.

Students develop the habit of creative learning early on.

ART is the food to our soul; it is the medium through which we process our emotions and ideas. Art enhances creative abilities and encourages imagination and can builds fine motor skills and neural connections. Art encourages problem solving and analytical thinking skills in students. As a result, they learn to make decisions, which will undoubtedly transfer to education and other aspects of life. Arts education encourages higher-level thinking to explore academic subjects and life outside of school.
